Filialei din Cluj a Academiei Române)

Indice de nume proprii

Indicele de nume proprii cuprinde cea mai mare parte a numelor proprii care apar în MS.45. O formă primară a indicelui a fost realizată semiautomat, într-o fază anterioară reviziei finale a textului, cu ajutorul unui program de adnotare morfologică (vezi Vlad Sebastian Patraș, Gabriela Pavel, Gabriela Haja, *Resurse lingvistice în format electronic. Biblia 1688. Regi I, Regi II. Probleme, soluții*, în Ionuț Cristian Pistol, Dan Cristea, Dan Tufiș (ed.), *Resurse lingvistice și instrumente pentru prelucrarea limbii române*, Editura Universității „Alexandru Ioan Cuza” din Iași, 2008, p. 51-60). În această etapă au lucrat atât membrii proiectului, cât și colaboratori externi. Numele proprii au fost indicate împreună cu instrumentele lor gramaticale, în ordine alfabetică. Cărțile biblice au fost dispuse în ordine alfabetică (vezi siglele în *Nota asupra ediției*). Siglele numerotate (e.g. 1Mac., 2Mac.; 1Reg., 2Reg.) au fost dispuse în ordine crescătoare și alfabetică, de exemplu: 1Mac., 1Reg., 2Mac., 2Reg. În cazul cărții *Esthâr*, întrucât în manuscris există două capitole numerotate cu 1, cel de-al doilea a fost numerotat în indice cu 2, continuând astfel până la sfârșitul cărții.

Întrucât există cuvinte care ridică probleme deosebite în privința încadrării lor în categoria numelor proprii (de obicei traduceri ale unor nume proprii ebraice) sau care sînt încadrate, în diverse traduceri ale *Septuagintei* și ale *Bibliei*, în general, fie în categoria numelor comune, fie în cea a numelor proprii, pentru consecvență, în indice nu au fost incluse:

a) numele de locuri descriptive, de exemplu: *Poarta Râpii* (Neem. 2:15), *Plînsori* (Jud. 2:5), *Hotar* (3Reg. 9:13), *Cèle de Aur* (Deut. 1:1), *Turnul a Sutei* (Neem. 3:1 *et al.*), *Mormînturile Poștei* (Num. 11:35), *Mormînt a Îngropării* (Ier. 19:6), *Poarta cea Păsoasă* (Neem. 3:2) etc.;

b) numele de sărbători, de exemplu: *Praznicul Azimilor*, *Praznicul Săptămînilor*, *Praznicul Corturilor* (2Paral. 8:13);

c) numele ebraice ale lunilor (e.g. *ădar*, *thanin*, *ziú*, *nu*), care au fost încadrate în categoria numelor comune;

d) numele de corpuri cerești, de exemplu: *Găinușa*, *Ralița*, *Luceafărul* (Iov. 9:9);

e) cuvinte sau sintagme precum *Atotputernicul*, *Despuitorul*, *Cel Înalt*, *Faraó*, situate în literatura de specialitate la granița dintre numele proprii și numele comune;

f) cuvintele din seria *loca obscura*, de exemplu: *Chéros*, de la gr. *κέρως* (Neem. 12:17);

g) unele xenisme (ebraisme și grecisme), interpretate în literatura de specialitate fie ca nume comune, fie ca nume proprii, de exemplu: *Apiliot* (1Mac. 12:37, Ier. 25:26), de la *ἀππιλιώτης*, -ου ‘east’ (GR.ENGL.); *Sadimoth* (4Reg. 23:4), de la *σαδιμώθ* ‘fields, terraces’ (GR.ENGL.).

În cazul numelor proprii compuse cu *Veth* ‘casă’ (e.g. *Vethsan*, *Vethfagor*, *Vethghedor*), unde acesta a fost tradus, a fost redat numai componentul transliterat, de exemplu: *San* din „casa San” (3Reg. 4:12), dar *Vethsan* (Ios. 17:11; 17:16; 21:25); *Fogor* din „casa Fogor” (Deut. 3:29), dar *Vethfagor* (Deut. 3:29; 4:46; 34:6). De asemenea, dat fiind faptul că în unele cazuri nu se poate stabili cu precizie dacă presupuziția categorială (*muntele*, *pămîntul*, *apa*, *cetatea* etc.) face parte din numele propriu, sintagme precum „*Muntele Faran*”, „*Pămîntul Gosom*”, „*poarta Veniamin*”, „*părul Arvona*” nu au fost incluse în indice.
